

## CHALLENGE

Write a small web app that retrieves data from an SQL database and creates a graph from it. Use an HTML5 / JS chart library for client-side chart rendering. Judging will be based on code quality, functionality, and design.

# Coding Challenge 2.0

## SCHEDULE

Oct. 5, 2016 (tentative)  
Detailed Specification Release  
and Contest Start

Oct. 18, 2016 (tentative)  
Submission Deadline

**[0]th Place:  
\$500**

[1]st Place: \$200 [2]nd Place: \$100

**Strut your skills!**

**All entrants will be considered for an internship!**

Go to [rde.org/CodingChallenge](http://rde.org/CodingChallenge) for more details and to enter.

# CONGRATS TO LAST CHALLENGE WINNERS!

## ABOUT RDE SYSTEMS

RDE Systems, makers of eCOMPAS®, has been serving public health for over twenty-five years. We are proud that RDE has grown only by referrals, and not through marketing and sales. Our business philosophy is simple, yet refreshingly uncommon in industry: "If you do good things for good people, good things happen." We are focused on the long-term interests of our clients, and our no-commission policy allows our consults to be pressure-free.

We believe in a partnering philosophy with our clients where we go above and beyond the scope of contract to ensure success beyond expectation. We choose to work only with clients who care about making a real difference, who value and appreciate innovation, and who have high standards of success.

## WHAT'S IT LIKE WORKING ON THE RDE TEAM?

Working at RDE is very different from being just another cog in a large corporate machine. We offer prospective developers the opportunity to take on many different roles: front-end design, back-end scripting, code hacking, security analysis, project management, and client interaction are all aspects of project development that developers are responsible for here. Every day offers new challenges and opportunities to explore your potential.

Visit us at [rde.org/NJIT](http://rde.org/NJIT) to learn more about our special partnership with NJIT.
