

CHALLENGE

Write a small web app for editing records in a database table. Use event-driven locking to prevent two users from editing the same field in the same record concurrently.

Use HTML5 WebSockets or Server-Sent Events to send event notifications from server to client and back. Judging will be based on code quality, functionality, and design.

Coding Challenge

[0]th Place:
\$500

[1]st Place: \$200 [2]nd Place: \$100

SCHEDULE

Feb. 10, 2016
Detailed Specification Release
and Contest Start

Mar. 1, 2016
Submission Deadline

Strut your skills!
All entrants will be considered for an internship!

Go to rde.org/CodingChallenge for more details and to enter.
